MULTIFUNCTIONAL TROLLEY

Autorobot[®]

Multifunctional trolley is designed to ease handling of heavy car wheels and doors, thus saving technicians e.g. from back strain. With this new multifunctional trolley, e.g. door installations are handy to perform alone without damaging painted surfaces.

This trolley is suitable for the removal and installation of the wheels of passenger cars and vans as well as handling of passenger car doors. Also doors of vans can be handled well with additional set.
